

Start fresh this spring by making a clean sweep of hazards that could cause injuries and illnesses. The following resources can help you spring into action:

- Attend a [free webinar](#), Three Core Elements of Effective Safety and Health Programs, Wednesday, April 25th at 2:00 p.m. EDT, to get ideas about showing management leadership, encouraging worker participation, and finding and fixing hazards in your workplace.
- Conduct a walk-around in your workplace using the tips in [Walk-Arounds for Safety Officers](#), a new product from OSHA, to guide your efforts to find and fix hazards.
- Improve your hazard identification skills by downloading OSHA's [Hazard Identification Training Tool](#), consulting the National Safety Council's [7 Common Workplace Safety Hazards](#), or attending Course #7205, Health Hazard Awareness, at an [OSHA Training Institute Education Center](#).
