

“For Safety’s Sake - Do Something”

Safety Always Culture

Our safety goal is “0” Lost Time Accidents. We need 100% participation. But what is your responsibility to achieve this goal? Safety, of course...but what does that look like?

Work and play safely wherever you are and whatever you are doing. Safety goals are not about living

your life in a bubble. They’re about performing tasks in a manner that minimizes possible negative outcomes (injury, illness, death). Climbing a ladder? Have a spotter; don’t lean out too far to your left or right. Running to the store quickly? Wear your seatbelt and slow down. Skydiving? Better make sure your parachute works! Get the idea?

Get training before performing unfamiliar tasks. ALWAYS ASK for training if you are going to use a piece of unfamiliar machinery, or work in an unfamiliar environment. Confirm that you have all of the PPE you need to perform the task safely. Would you try flying a plane without instruction? Or using a chainsaw for the first time without reading a manual or having someone show you? Some equipment, or environments have less than obvious hazards, which is why it is extremely important that you learn all you can before performing the task.

Watch out for each other. It turns out that common sense is a rare commodity. If you see a coworker performing an unsafe task, say something immediately. Not only for his / her safety, but for your and the company’s benefit as well. If someone is injured on the job, it affects all of us. *For Safety’s Sake, Do Something!*

3 Unsafe Behaviors of Coworkers

Indifference. Employees who are not concerned about their own safety and/or the safety of those around them put everyone at risk. Unsafe workers also endanger the success of a company.

Shyness. Employees who are afraid to ask for training on equipment, or procedures, increase their risk of injury. They will also put their coworkers at risk if they are afraid to point out if a coworker is unsafe.

Feeling exempt from this safety message. Don’t work on a project site? Not involved with machinery or equipment? These employees still count! Literally, they are in the staff count - administrative, co-op, intern - all of us! If an employee gets injured falling in the hallway or hurting their back from improper desk posture, that counts against our safety metrics.

Our mission

Making clients successful by saving them time, trouble, and money.

Our vision

World-class people, delivering world-class projects, for world-class clients. We are the Global Project Delivery company that others aspire to imitate:

- Safety-always culture.
- Continuous efficiency improvements / innovation.
- Prominence in our markets.
- Career growth opportunities.
- Employee prosperity.
- Diversity of thought.
- Growth in strategic areas.
- Competitive advantage.
- Adding the greatest client value and environmental sustainability.
