Basic Fall Protection & Equipment Inspection Training

**Thursday,
Nov. 16, 2017**
8:00 a. m. – 4:30 p.m.

Presented by the

The Basics of Fall Protection
8:00 a.m. - Noon

This 4-hour session of the training is designed for industrial, construction, and utility safety and supervisory personnel who face questions and decisions daily on how to do fall protection. In addition to explaining the parts of fall arrest systems and showing how they work this seminar will show actual equipment that can make fall protection quicker and easier.

Course Syllabus

Introduction

- Leading causes of death in industry today in which falls rank # 2
- Regulatory requirements for fall protection
- The 4 foot vs. 6 foot rule
- Options for preventing falls
- Explanation of the ABC's of fall protection

Anchorage

- OSHA anchorage requirements
- A demonstration of why 5000 pound anchors are required
- Anchorage requirements for horizontal lifelines
- Anchorage connection methods

Body Support

- Full body harnesses vs. body belts
- Purpose of various rings on the harness
- Inspection requirements
- Special considerations including marking on harnesses, tape, etc.

Connecting Means

- A demonstration of the reduction in maximum arresting force achieved with a shock absorbing lanyard.
- Determining fall clearance requirements
- The proper use of self-retracting lifelines including leading edge work, ratcheting, full extension use, proper storage, and inspection
- Other methods including rope grab and ladder climber systems, and aerial lift requirements.

Decent and Rescue

- Rescue options
- Developing a rescue plan
- The latest in rescue equipment available.

Fall Protection Equipment Inspection
12:30 p.m – 4:30 p.m.

This 4-hour session of the training deals with the process of developing an inspection program and applying that to practical equipment inspection. Participants completing the course will be given the tools necessary in able to conduct pre-use and annual inspections of fall protection equipment. Students will be provided with a comprehensive inspection manual with checklists and a certificate upon completion of the course.

Course Syllabus

Importance of Equipment Inspection and Maintenance

- User inspection (daily inspections)
- Manufacturer recommendations
- Governing bodies requirements
- Standards associations influence

Inspection and Maintenance Recordkeeping
Soft Goods Inspection

- Harnesses
- Lanyards
- Web anchorage connectors

Hard Goods Inspection Criteria

- SRL's
- Cable Products
- Snaphooks, carabiners
- D-rings and buckles
- Review of technical bulletins

Inspection exercises (various pieces of gear are inspected) Inspection quiz and wrap up

This program will cover all the aspects of fall protection equipment training including:

- Legislation and Standards applicable to fall protection equipment inspection.
- Inspection theory for harnesses, lanyards & shock absorbers, carabiners, anchorage connectors, and self-retracting lifelines.
- Equipment logs and recording the inspection.
- Practical equipment inspections of faulty gear.

***BOTH TRAINING SESSIONS MUST BE
ATTENDED TO RECEIVE CERTIFICATION.***
