

Building Stronger Safety Leaders

Safety leaders understand the pivotal role that *frontline supervisors* and *site leaders* play in shaping the safety mindset of the workforce. However, supervisors don't always recognize just how much their daily decisions, actions, and attitudes influence safety performance.

This 2-day, hands-on program is designed specifically for *frontline supervisors* and *site leaders*. Participants will gain a better understanding of the bigger picture of workplace safety and, most importantly, their critical role in creating and maintaining a safer work environment.

Through practical, interactive learning, participants will develop the knowledge, skills, and confidence needed to become stronger safety leaders and help build a workplace where safety is everyone's responsibility.

Upon completion of the Supervisor Safety Certificate Training course, a supervisor will be able to:

- Determine compliance with OSHA regulations
- Understand supervisor's responsibilities for safety.
- Perform a worksite analysis
- Recognize hazards
- Determine what potential effects an identified hazard may have
- Determine how to control identified hazards
- Communicate hazard-related information to personnel in the field and in administrative positions
- Basic Leadership Skills
- Understand some of the psychology that drives employees' "unsafe" behaviors

**Wed., Sept. 30 &
Thurs., Oct. 1, 2026**

**Wed. - 8:00 am – 4:30 pm
Thurs. - 8:00 am – 4:30 pm**

Location:

Safety Council of NW Ohio
8015 Rinker Pointe Ct.
