

Achieving an injury-free workplace takes more than a catchy phrase or one individual championing the cause. It takes a team effort. All workers need to be engaged in the safety culture. Safety leaders understand the pivotal role that frontline supervisors play in shaping the safety mindset in the workforce, and often wish that frontline supervisors understood this as well. This **2.5 day** hands-on program helps frontline supervisors and site leaders enhance their understanding of the bigger picture of safety and their role in creating a safer work environment.

**Upon completion of the SAF Frontline Safety Training course, a supervisor will be able to:**

- Describe how exposures to hazards can lead to accidents
- Perform a worksite analysis
- Recognize hazards
- Determine what potential effects an identified hazard may have
- Determine what the OSHA Code of Federal Regulations say regarding an identified hazard
- Determine how to control identified hazards
- Communicate hazard-related information to personnel in the field and in administrative positions
- Initiate an accident investigation
- Understand some of the psychology that drives employees' "unsafe" behaviors

**2024 Dates**

March 5 – March 7  
Sept. 30 – Oct. 2
